

VISION

Being born as a human being in India is a privilege, but to be able to become a human being is a challenge that each one of us faces today.

Swami Vivekanand has inspired the whole world. His words of wisdom “They only live, who live for others. The rest are more dead than alive” has inspired me the most in my life.

Deen Dayal Upadhyay’s theory of integral humanism is the best theory for any political worker to implement in his own life for the betterment of mankind, society and the nation.

Let all of us put our heart & soul into making an India of our dreams 'Vishwa Gura Bharat' where everyone shall be prosperous, free of disease and with a pious heart & soul.

Let us pledge to make health & Education a social movement for achieving the goal of Health for all for our country. India has the potential to create a successful and replicable model in every field for the whole world including health. Our ancient medical wisdom has successfully wished everyone.

“The more I look at human beings, the more I love my dog”. Someone said it once.. It should inspire us to introspect our behavior towards fellow human beings with utmost sincerity.

Let everyone think about one's health, develop positive health attitude and life styles and strengthen preventive strategies for health. Let us walk a little bit for our own health. Let us eat a little less for our own health and ensure absence of physical inactivity in our life and also in the life of our friends, well-wishers & countrymen.

Let us pledge to wipe a few tears from the face of the most deprived, most deprived of even the basic needs of life whether it is house, food, shelter, education, sanitation, clothes.

Let us pledge to live an ego-less life, full of love and compassion for others, learn to share love and sorrow, distribute prosperity & take back sufferings.
